Sir:

RESPONSE UNDER 37 CFR 1.116

In response to the Office Action mailed June 8, 2000, please
amend the above-identified application as follows, without prejudice.

In the Claims:

Please amend claim 32 as set forth below:

32. (Once Amended) An electronic still camera for
initiating capture of a still image while previewing motion images on a display,
comprising:

(a) an image sensor having a two-dimensional array of
photosites covered by a mosaic pattern of color filters for capturing images of a
scene, each captured image having a first number of color pixel values provided in
a first color pattern;

(b) [first] motion processing means for generating from the
captured images, a [first] second number of color pixel values provided in a
second color pattern and representative of a series of motion images to be
previewed, the second number of color pixel values being less than the first
